## **Warren/Amplex Superabrasives Q&A Director**

Warren/Amplex Superabrasives hired Jaime Montano as Director of Quality Assurance and Control at their diamond powder micronizing facility in Olyphant, Pennsylvania. His immediate responsibilities will focus on laboratory operations as well as overseeing all control processes related to product quality and development.

Montano brings manufacturing and engineering expertise developed through tenure as a Manufacturing Engineer at Hitachi Global Storage Technologies and as a Co-Op Engineer at IBM Storage Technology Division, (San Jose, Calif.). Warren/Amplex Superabrasives, a Division of Saint-Gobain Ceramics and Plastics, Inc, engineers diamond powder and formulated compound products for universal application in designated design areas, such as Material Processing, PCD Manufacturing, Coatings and Electrical Component Processing.
